

# Case Study

## Ammoora - Baltimore, MD

Exclusively housed within the Ritz-Carlton Residences Baltimore, Ammoora restaurant immerses guest in an intimate exquisite dining experience presented and prepared with award-winning skill and finesse.

The multi-layered lighting required different types of controls for different luminaires as well as specific settings per fixture type for harmonious scene transitions.

Most of the control occurs through switches and a touchscreen, and the hosts/hostesses utilize an iPad to establish the perfect table dimming level for each guest.

The system controls the exterior lighting and water fountains as well, and a gateway allows for remote access to the network.
