CLOUD SERVICES

Multiple Site Remote Management

Remotely leverage all of BubblyNet's existing capabilities, you will be able to operate and manage your existing Lighting Controls, Zones, Power, Color Temperatures, RGBW, Scenes, Schedules and Occupancy and all the other features that make BubblyNet the most capable smart building control software on the market.

Features include:

Remote Device Monitoring | User Access Control | Remote Support | Remote Touchscreen Management | Preventative Fixture Maintenance | Site Pre-Commissioning

Your Networks
List of BubblyNet networks you have permissions to control or manage.

NETWORK	USER LEVEL	DEVICES	SUBSCRIPTION	CONTROL	TOUCHSCREENS
HQ Building North	Advanced	2	None	Control	Touchscreens
HQ Warehouse	Basic	27	None	Control	Touchscreens
Denver Plant	Advanced	20	None	Control	Touchscreens
Phoenix Plant	Advanced	17	None	Control	Touchscreens
Atlanta Plant	Advanced	46	None	Control	Touchscreens
Omaha Campus	Pro	623	None	Control	Touchscreens

Energy & Sustainability Management

Our Energy and Sustainability Monitoring provides an unprecedented view into a site's energy usage, air quality & occupancy status. With active monitoring in real-time, and the ability to report and graph by zone with comparative reporting through past periods. Your ability to understand your environment has never been this detailed.

Features include:

Calculated Energy Usage | Measured Energy Usage | Third Party Billing | Energy Reporting

BubblyNet®
human-centric building control

Wireless Luminaire Level Lighting Controls (LLLC)

BubblyNet is a completely wireless Bluetooth® Mesh Network Lighting Controls software that has expanded past the lighting sphere and into the world of smart buildings.

BubblyNet Fixture Integrated controllers allow any fixture to be a Wireless Smart fixture leveraging all of the capabilities of BubblyNet wireless software. Our Fixture sensors are available in a variety of configurations for different detection methods and controls/output.

Features include:

Occupancy | Daylight Sensing | Motion Sensing | Timers | Schedules | Scenes | Shade Control | Energy Monitoring | Preventative Fixture Maintenance | BACnet Integration

BubblyNet offers integration with **BACnet** to maximise energy savings in your HVAC System through occupancy sensing, routines and scheduling. Giving you wireless and remote temperature control.

ASHRAE BACnet™
